

Excel Add-in Release Notes

7th August 2021

Version 1.3.900.0

What's New?

This release of the Fastmarkets Excel Add-in delivers new features and functionality outlined below.

For **ALL** customers who are below version 1.3.186 this is a mandatory upgrade which cannot be postponed. If you are upgrading from a previous version of Fastmarkets Excel Add-In you will still be able to access everything you had previously.

If you are on version 1.3.186 or above it will be possible to postpone the update.

- **A new “Recalculate” button for the toolbar** – this will provide a toolbar button enabling you to refresh ALL open workbooks (not just those using Fastmarkets functions) and is the same as the existing Control + Alt + F9 key stroke to update with the most recent assessments in spreadsheets.
- **Field name change** - the existing Appraisal Price field name will change to Preliminary Price – it denotes that the price is preliminary prior to being a final assessment price and will provide a TRUE or FALSE result. Preliminary prices (displaying a TRUE result) is only available for a proportion of our prices. This means for any customers using this existing field name they will need to amend it after the release to retrieve the data. This change is taking place to harmonise pricing fields for both Fastmarkets Metals & Mining and Forest content.

Bug Fix

There are no bug fixes with this release.

Breaking Changes

There are no breaking changes with this release.
